

«Metaclass»  
Class

«Stereotype»  
ConstraintBlock

```
classDiagram
    class Metaclass["«Metaclass» Class"]
    class ConstraintBlock["«Stereotype» ConstraintBlock"]
    ConstraintBlock --|> Metaclass
```

The diagram illustrates a generalization relationship in UML. A light blue box at the top left represents the superclass, labeled «Metaclass» Class. A white box at the bottom right represents the subclass, labeled «Stereotype» ConstraintBlock. The subclass box is divided into three horizontal compartments: the top one contains the name, and the two below are empty. A solid black arrow points from the top compartment of the subclass box to the bottom edge of the superclass box, indicating that «Stereotype» ConstraintBlock is a specialization of «Metaclass» Class.
